

Stretching for fantasy

AREAS OF APPLICATION

For general sewing purposes, this highly ELASTIC thread, made of elastane and polyester, is particularly suited to smocking on both rigid and stretchable fabrics. For quilting, truly beautiful effects and even 3D effects can be achieved on surfaces.

If the ELASTIC thread is used as a bobbin thread, the thickness can be regulated by the bobbin thread tension. Many sewing machine manufacturers provide a range of suitable needles with which the ELASTIC thread can be couched using a feed foot. The thickness of the ripple can be regulated using the bobbin thread tension.

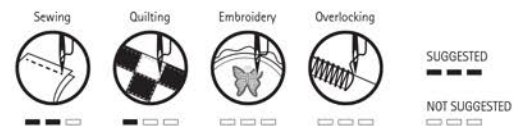

Further applications include frill seams in hemming and bubble embroidery. Here, relatively long step stitches are used and invisible stitching is also an absolute necessity.

PRODUCT FEATURES

Large colour selection

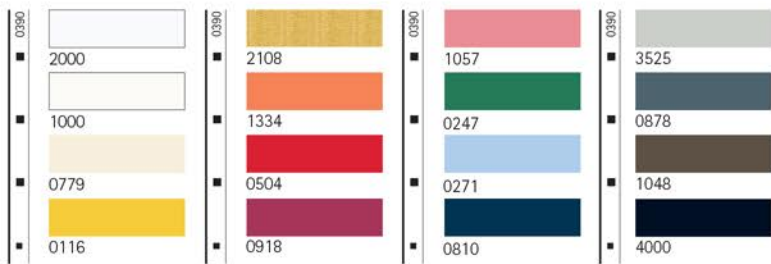

The ELASTIC thread is available from Amann Group Mettler in 16 fashionable colours.

RECOMMENDATION OF APPLICATION

Article no.	Raw Material	Strength	Length	Number of colours	Linear density	Tensile strength cN	Elongation at break %	Care Instructions
0390	60% Elastane 40% Polyester	18	10m / 11 yds	16	ca. Nm 3,05 (tex 328,3)	ca. 16	ca. 300
